PROFESSIONAL SUMMARY

Accomplished and growth-oriented **Software Engineer** with over 6 years of hands-on experience specializing in **Native Android Development** (Kotlin, Java, Jetpack Compose) and modern **Frontend Web Development** (Next.js, TypeScript, Tailwind CSS). Demonstrated success in architecting scalable mobile applications, engineering reusable developer SDKs/libraries, and establishing automated CI/CD build pipelines. Founder and lead maintainer of the open-source **Frogobox** ecosystem (e.g., *Frogo-Recycler-View*, *Frogo SDK*). Proven background delivering mission-critical applications across fintech, e-commerce, journalism, healthcare, and enterprise messaging. Strong advocate of clean architecture (MVVM/MVI), reactive programming, and AI-accelerated modern development workflows.

SKILLS & TECHNICAL PROFICIENCIES

Mobile Development: Kotlin, Java, Jetpack Compose, Android SDK, Android Jetpack (ViewModel, LiveData, StateFlow, Room, Navigation, WorkManager, Paging 3), Coroutines & Flow, Dependency Injection (Dagger Hilt, Koin), Retrofit2, OkHttp3, CameraX, Google Play Store Guidelines & Deployment.

Web & Frontend: Next.js (App & Pages Router), React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Design, PWA (Serwist).

Architecture & Quality: Clean Architecture, MVVM, MVI, Repository Pattern, SOLID Principles, Test-Driven Development (TDD), JUnit, Mockito, Android Profiler.

DevOps & Tools: Git, GitHub Actions (Automated Android CI/CD), Gradle (Kotlin DSL), Android Studio, Postman, Vercel, Firebase (FCM, Analytics, Crashlytics), AI Vibes Coding.

PROFESSIONAL EXPERIENCE

Software Engineer (Android & Frontend Next.js)

September 2023 – Present

Qomunal (PT Qomunal / PT Aset Solusi Digital) — Jakarta Selatan, Indonesia

- Architect and develop production-grade Android apps and Next.js web solutions across multiple business sectors.
- Engineered and launched key applications: **Qomunal Android** (community management), **Tokowibu** (E-commerce web & Android), **SJI** (School of Journalism Indonesia education app), **Hening** (mindfulness & mental wellness audio app), and **NewLife** (mother and child healthcare companion).
- Modernized legacy codebases to Jetpack Compose and Kotlin Coroutines/Flow, reducing boilerplate by over 40% and elevating UI responsiveness.
- Engineered resilient offline-caching mechanisms and unified REST API data synchronization with token refresh handling.

Android Engineer

June 2022 – March 2023

KoinWorks (PT Lunaria Annua Teknologi) — Jakarta Selatan, Indonesia

- Engineered core peer-to-peer (P2P) lending and financial super-app modules serving millions of registered Indonesian users.
- Collaborated in cross-functional agile squads with Product, Backend, QA, and Security to build KYC authentication, digital onboarding, and automated payment flows.
- Refactored legacy Java modules to Kotlin following Clean Architecture & MVVM, sustaining >99.5% crash-free user sessions.
- Optimized Room SQLite queries and network caching, decreasing dashboard initialization latency.

Android Engineer

June 2022 – June 2022

PT Rumahawan Karya Indonesia — Jakarta Selatan, Indonesia

- Contributed to Android architecture planning and features for real estate property solutions.

Android Programmer (Internship)

July 2020 – December 2020

ChatAja Messenger — Bandung, West Java, Indonesia

- Developed native chat UI components, background push notification listeners (FCM), and local SQLite data synchronization.
- Debugged and fixed multithreading race conditions across real-time socket events.

Android Programmer

June 2019 – September 2019

GITS Indonesia — Bandung, West Java, Indonesia

- Constructed custom enterprise Android client applications using MVVM architecture and REST API integrations.

Android Programmer (Internship)

January 2019 – May 2019

Kodelokus — Bandung, West Java, Indonesia

- Built Android client UI layouts, responsive components, and resolved multi-device display bugs.

OPEN-SOURCE ECOSYSTEM & KEY PROJECTS**Frogo-Recycler-View**

Frogobox Media

Zero-adapter boilerplate library for Android RecyclerView, supporting multi-view layouts, empty states, and Jetpack Compose interoperability.

Frogo SDK (frogo-sdk, frogo-core, frogo-admob)

Frogobox Media

Modular Android core SDK providing reusable consumable code wrappers for network requests, helper utilities, and rapid ad mediation.

Automated Android CI/CD via GitHub Actions

DevOps Template

Comprehensive continuous integration template for building, signing with keystore, and releasing Android APK/AAB packages automatically.

EDUCATION & CREDENTIALS**Bachelor of Informatics (S1 Informatika)**

Graduated 2022

Telkom University — Bandung, Indonesia

- Thesis: *"Framework Developer for Creating Nutrition-Related Applications based on Android Platform"*.
- Intellectual Property: Formally awarded Ministry Copyright Certificate for *MicroNutrient Application Generator*.

Associate Degree in Software Engineering (D3 RPL Aplikasi)

2016 – 2019

Telkom University — Bandung, Indonesia

- Final Project: *Finpro* (Final Project Management & Examination Android Application System).

High School Diploma (MIPA)

2013 – 2016

SMAN 1 Probolinggo — Probolinggo, East Java, Indonesia**LANGUAGES****Indonesian:** Native Proficiency | **English:** Professional Working Proficiency
